

COF MONOMERS & MOF LIGANDS

Covalent-organic frameworks (COFs) and metal-organic frameworks (MOFs), emerging highly porous materials, have been extensively studied in the past 3 decades, especially in gas storage, separation, catalysis, and so on. By hiring different monomers/ligands the structures and properties of the COFs/MOFs can be quite different. Herein, we are proud to offer a suite of COF monomers and MOF ligands for the synthesis of novel COFs and MOFs, they are offered at very competitive prices and in the range of 100 mg to 500 g quantities.
